

School Yard Habitat Projects

Fairbanks Soil and Water Conservation District

Cantwell

Constructed an outdoor learning area and planted a pollinator garden in front of the school. Restoration work continues in spring of 2015.

JP Jones

Landscape restoration with trees and plants, constructed an outdoor play scape and two pollinator gardens.

Minto

Constructed a nature trail and an outdoor learning center, and installed a pollinator garden, provided natural resource learning materials and lessons.

Nenana

Built an outdoor learning area, restored and constructed trail to Nenana River, clean-up of 200 ft. of Nenana Riverfront, planted native trees, shrubs, provided natural resource lessons and learning materials.

North Pole Middle School

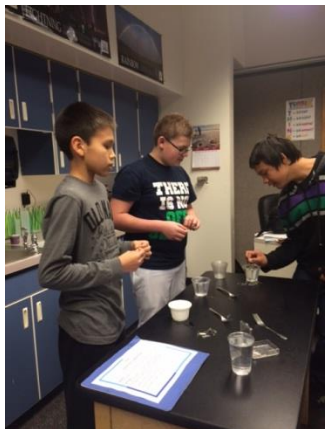

Built outdoor learning center, purchased hip wader boots and other equipment for Slough exploration, planted native trees and shrubs, provided water and forestry lessons.

North Slope Borough

Provided Project WET and Project Wild education, initial construction phase for a boardwalk nature trail in Barrow, began tundra soils and plants study, provided natural resource lessons and supplies, began planning for school yard habitat in Anaktuvuk Pass and Pt. Hope.

Barrow

Anaktuvuk

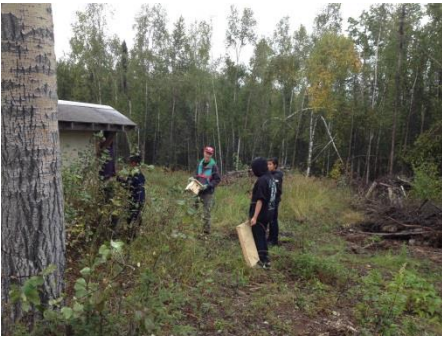

Barrow

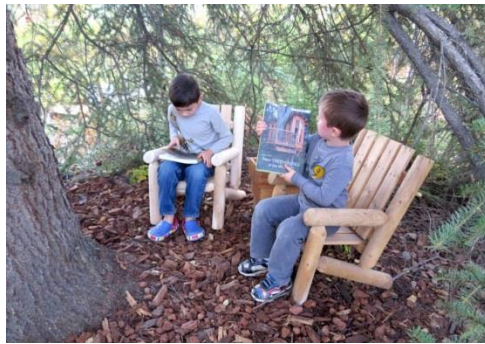

Ruby

Restored the two mile nature trail and developed a pollinator garden in front of the school, installed bird and bat boxes. Provided natural resource lessons and supplies.

Thread

Partnered with other organizations to install a rain garden with native plants and shrubs and an outdoor learning area.

Tri Valley

Installed a pollinator garden and provided natural resource lessons and supplies to the students. Restored two acres of uplands. Removed man-made debris, from a half of a mile portion of trail. Assisted in restoration and fire proofing school grounds by removing fuel sources.

Two Rivers

Restored uplands with native trees and shrubs which provide an outdoor learning area. Planted two pollinator gardens and a rain garden. Planted native trees on the school grounds.

Wood River

Installed two rain gardens and an outdoor trail in school ground areas restored by planting native trees, plants and shrubs.
